Mercantile Bank Holdings Limited and its subsidiaries
(“the Group”)
Unaudited bi-annual disclosure
30 June 2011

Disclosure in terms of Regulation 43 relating to banks issued under section 90 of the Banks Act No. 94 of 1990 as amended

1. Basis of compilation

The following information is compiled in terms of Regulation 43 relating to banks issued under section 90 of the Banks Act No.94 of 1990 (as amended) the ("Regulations"), which incorporates the Basel II Pillar Three requirements on market discipline.

All disclosures presented below are consistent with those disclosed in terms of International Financial Reporting Standards ("IFRS") unless otherwise stated. In the main, differences between IFRS and information disclosed in terms of the Regulations relate to the definition of capital and the calculation and measurement thereof.

These disclosures have been prepared in compliance with the Group's disclosure policy.

2. Scope of reporting

This report covers the consolidated results of Mercantile Bank Holdings Limited and its subsidiaries ("the Group") for the six months ending 30 June 2011.

Mercantile Bank Holdings Limited is a registered bank controlling and investment holding company. Its holding company is Caixa Geral de Depósitos S.A. ("CGD"), a company registered in Portugal.

There are currently no restrictions or other major impediments on the transfer of funds or capital within the Group.

3. Detailed disclosures

3.1 Credit risk

The Group has adopted the standardised approach to determine the capital requirement for credit risk on all portfolios. The Group does not intend to migrate to the internal ratings based approach for credit risk in the short-term.

The Group primarily advances funds to unrated counterparties. In the case of exposures to rated counterparties, the process of risk weighting these exposures is in accordance with the requirements of the Bank Regulations.

(1) Only inward bank guarantees and eligible pledged investments and/or liquid funds are taken into account as credit risk mitigation. Inward guarantees are mainly received from CGD. Other forms of credit risk mitigation in the form of collateral are non-qualifying in terms of the Bank Regulations and are commented on below.

The Group uses on- and off- balance sheet netting to restrict its exposure to credit losses. When a client maintains both debit and credit balances with the Group and the Group enters into a netting agreement in respect of the relevant loans and deposits with the said counterparty, the Group may regard the exposure as a collateralised exposure in accordance with Regulation 23 of the Bank Regulations. As at 30 June 2011, the Group did not recognise any netting arrangements to reduce its credit risk exposures for capital adequacy requirements.

Policies and processes for collateral valuation and management

Dependent upon the risk profile of the customer, the risk inherent in the product offering and the track record/payment history of the client, varying types and levels of security are taken to reduce credit related risks. These include inter alia pledges of investments, mortgage and notarial bonds, guarantees and cession of debtors. Various levels of security value are attached to the different categories of security taken. The value of the security is reviewed regularly and the Group does not have any material concentration risk in respect of collateral used to reduce credit risk. Clean or unsecured lending will only be considered for financially strong borrowers.

A financial asset is past due when the counterparty has failed to make a payment when contractually due and is based on appropriate rules and assumptions per product type. An impairment loss is recognised if and only if, there is objective evidence that a financial asset or group of financial assets is impaired. Impaired exposure relates to assets that are individually determined to be impaired at reporting date.

3.6 Interest rate risk

Interest rate sensitivity analyses

For regulatory purposes, the assessment and measurement of interest rate risk is based on the accumulated impact of interest rate sensitive instruments resulting from a parallel movement of plus or minus 200 basis points on the yield curve.

In addition, the impact on equity and profit and loss resulting from a change in interest rates is calculated monthly based on management's forecast of the most likely change in interest rates.

The table below reflects the Group's annual net interest income sensitivity for a 200 basis point increase or decrease in interest rates, while all other variables remain constant. The impact is mainly attributable to the Group's exposure to interest rates on its capital position and lending and borrowings in the banking book.
